– <mark>tiny tracker</mark> —

Notes: Customised attributes can be created for Children, Users and Parents. For example, a mediconcern (for children) or a first aid qualification (for users) can be noted as an Attribute. If y are a school, these would be in addition to the data that comes across from your MIS. You need to have administrator privileges to manage children's details. 1. Add a New Attribute Select Add Attribute. Select Add Attribute. Image: Select Add Attribute. Image: Select Attribute Details	ıts
1. Add a New Attribute Select Add Attribute 2. Attribute Details	xample, a medical n Attribute . If you your MIS.
