How to Record Individual Observations			
Notes: This help sheet shows the default hand print icons and uses Emerging, Developing and Secure, but your setting may have chosen different icons and customised the terminology. When you add this observation, an achievement is recorded and a large handprint will be filled on the individual record.			
1.	 Add Observation The title box is automatically filled in but can be edited. Select the audience for your observation. Add a commentary or notes to your observation. Select small handprints to show small step objectives achieved if required. 	Add Observation	
2.	Depending on your device and screen size, this information may be split over two tabs, as shown here.	Add Observation	<text><text><text><image/><image/><section-header><section-header><section-header><section-header><section-header><section-header></section-header></section-header></section-header></section-header></section-header></section-header></text></text></text>
3.	Adding Leuven Assessments	Add Observation	×
	If your setting has enabled Leuven Scales, you can add these by clicking the Leven Scales tab. Choose the scale point 1-5 for Well-being and Involvement.	Leuver Well-Being Involvement Uronous and the cycling or consenting. They may hold sast, flightmed or avgrap, The diad due not respond to the environment, avoids contact and is withdown. The child may behave aggressively, harding involvement or others. 2: Low The polarite, facilit expression and actions indicate that the child does not field at ease. However, the signals are less englot than the least 1 adult the insert of adult does not field at ease. However, the signals are less englot than the least 1 adult the insert of adult does not field at ease. However, the signals are less englot than the least 1 adult the insert of adult does not field at ease. However, the signals are here does not float any moments and pontum shows there are no signs notating advance or planame, conduct or decomfort. They are ready-enfluxiatic and contact with other didlem to basis. There are not many moments of real autification. 4: High	Depending Depending
