

## Rebecca Jewitt – Whitby Heath Primary School

We introduced the Educater system in Autumn 2019 and following training and support from Karen Thompson, we were able to roll it out across the school as a way of not just tracking progress and attainment, but identifying Gaps In Learning to inform planning and evaluation of our curriculum.

Following school partial closures due to COVID-19, the Gaps In Learning report analysis and the other reports available via Educater to inform Pupil Progress meetings, enabled us to further analyse which COVID catch up areas were to be targeted.

Educater has a wide range of reports and analysis tools which provide class teachers with all of the necessary information to make informed decisions about adapting planning, teaching and learning to target Gaps In Learning.

Our school uses Educater for English, Maths and EYFS.
