3D Shapes

In Maths we are looking at the names of 3D shapes and their properties.

We talked about whether they had faces, edges and vertices. The Children identified if the faces were flat or curved. We looked to see if the shapes rolled and could we build a tower with them all - we discovered that we couldn't!

All of the Children were engaged and enjoyed trying to build the tallest towers.

Observed: 08-Jun-2022

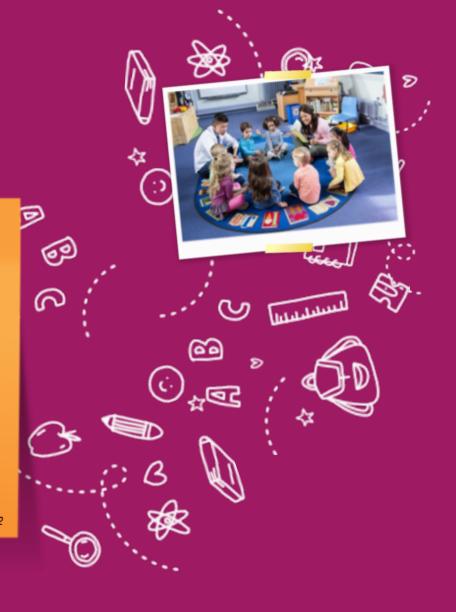

Maths - Recognising a number of objects

In Maths we have been looking at recognising numbers by subitizing. This means looking at objects or drawings and being able to say the number it represents without counting them.

The Children tried really hard and although they found it hard sometimes, they did such an amazing job - Well done!
