The Educater Suite

Educater is an independent educational software solution for schools, early years settings and other organisations providing bespoke tools for:

- **Assessment and Tracking**
- **Early Years Tracking**
- **Observations**
- **Report Writing**
- **Communication**
- **Analytics**
- **SEND Process Management**
- **SEF**

Our modular based platform has been exclusively designed to **dramatically reduce data management burden** and **teacher workload**.

Choose to input your own **flexible curriculum** into the system and customise the platform in a way that is right for your setting.

We integrate with all key MIS's within schools and data can be imported into our system effortlessly from other tracking systems if required.

We can provide you with a tool to meet your every need, whether this is through one of our standard templates or via our bespoke service –
we are here to help you.

Founded in February 2014 and fully launched in September 2015, Educater has since gained hundreds of users across a variety of settings in both the UK and overseas.

Our team strike the perfect balance between software and education industry knowledge. Educater was created by software development experts who specialise in collaborative solutions, working together with industry experts from educational settings and educational bodies.

At Educater, we understand how valuable your time is. That is why our system allows your team and leaders to spend more time effectively in your specific setting and helps to make planning more manageable.

Our vision is to provide you with a system that is reliable, straightforward and user-friendly. Educater is flexible in both content and use, allowing you to make it as simple, or as complex as required.

Our team are always ready and on hand to support your team and leaders. We have an in-house Customer Service Team, who are available to support you with any questions that may arise. We also have an in-house Development Team, one of whom is dedicated to Customer Support, ensuring we meet your every need.

Our experienced Education Consultants are able to showcase our system and also meet with staff members to discuss requirements and provide staff training. Our entire support team are focussed on ensuring ongoing support and are here to help every step of the way.

We want to help. We understand how important it is to find a system that will allow you to easily setup and manage your students and data effortlessly. You may want to focus on assessment, observation tracking, reporting, SEND, or everything. Whatever your needs, we have a flexible and reliable system that you will benefit from. We can provide training from one of our highly skilled Education Consultants and our Customer Service Team are also on hand for support and guidance.

To make it even simpler, we offer exclusive bundles that will help you find the perfect solution. See pages 29-30.

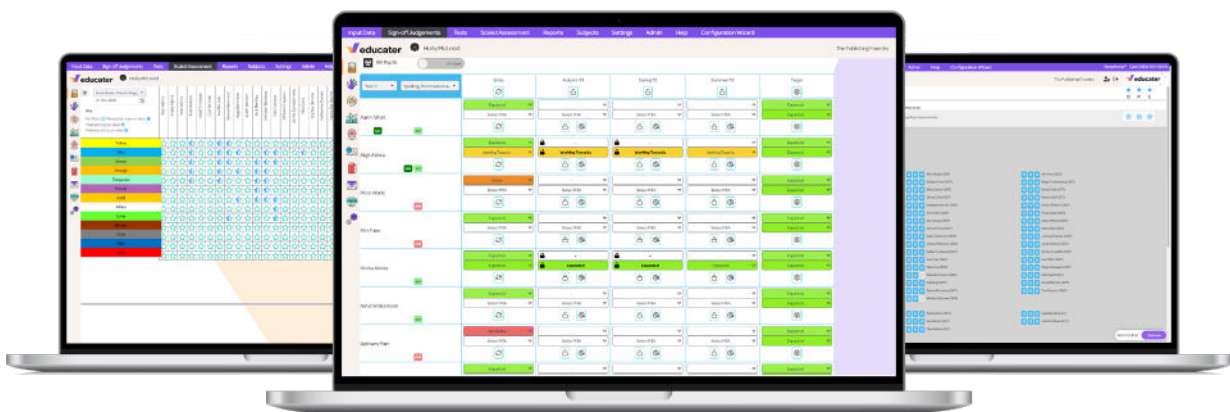

Assessment Hub

Assessment Tracker

Using Assessment Tracker allows you to track pupil data effortlessly, giving clear accessible insights into pupil attainment and progress. This will enable you to understand the needs of your school and identify any Gaps In Learning. We recognise the range of assessment requirements from tracking objectives in the curriculum to the growing emphasis on broader teacher judgement.

What is included in Assessment Tracker?

Multiple Frameworks

Our range of frameworks allows you to emulate your existing methodology or choose a new methodology, by subject, in a flexible manner. Our system allows you to track progress against all statutory assessments including the new Reception Baseline assessment, to easily monitor Gaps In Learning and cope with catch up planning required from the COVID-19 period.

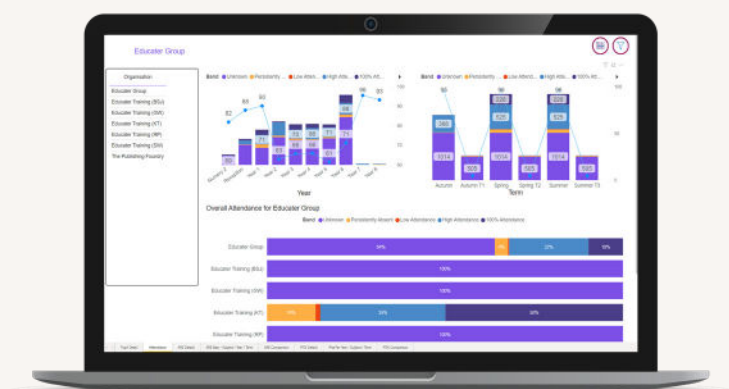

Multiple Content

We source from a wide range of content providers including the National Curriculum and that of leading providers, such as STAT Sheffield, Rising Stars and Pearson. You can choose your own elements of these or create your own custom content resulting in a totally bespoke curriculum.

Powerful Reporting

Within our Assessment module you will find our powerful assessment reports. We have several different reporting categories such as Contextual, Attainment, Progress, Prior Attainment, Pupil, and Interactive Reports. Each of these are packed with various styles of reports which will generate detailed information about your pupils and your school.

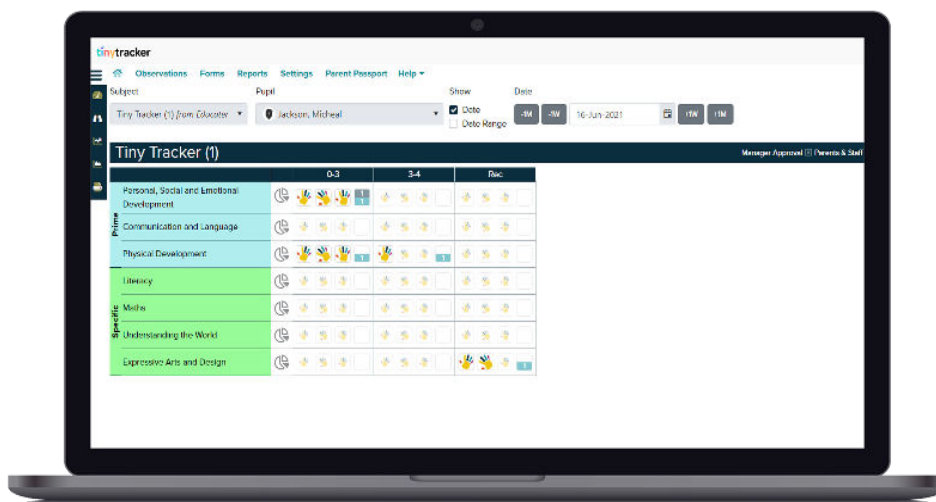

Using our powerful assessment reports, you can analyse your pupil progress and see Gaps In Learning and other trends. We have our interactive Power BI Reports and MAT Dashboard which provides a customisable and easy to use functionality, allowing schools to filter their data specifically to their needs and simply analyse reports with colleagues.

Tiny Tracker

Tiny Tracker is an EYFS tracker and learning journal that allows practitioners to share evidence with parents so that they can see for themselves how their children flourish from the start of their learning journey. Early years settings can identify and track how young children are progressing and evidence their journey through their Early Years Foundation Stage (EYFS).

How does Tiny Tracker track Early Years?

Observation and Tracking

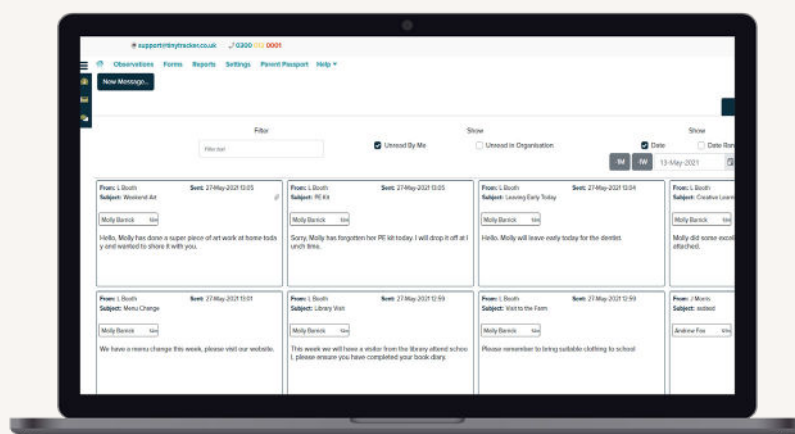

Upload pictures, videos and audio files to evidence the work children complete. We provide a choice of frameworks to choose from and you can monitor children against multiple curriculum content including EYFS, ELG and the Development Matters frameworks. Alternatively choose to implement the Birth to 5 Matters guidance.

Reporting

Reporting on Tiny Tracker provides practitioners with the ability to evidence a child's progress by creating a Learning Journey. Observers can look back at how a child has progressed through their early years. We also offer a Gaps In Learning report to help you understand the needs of your setting.

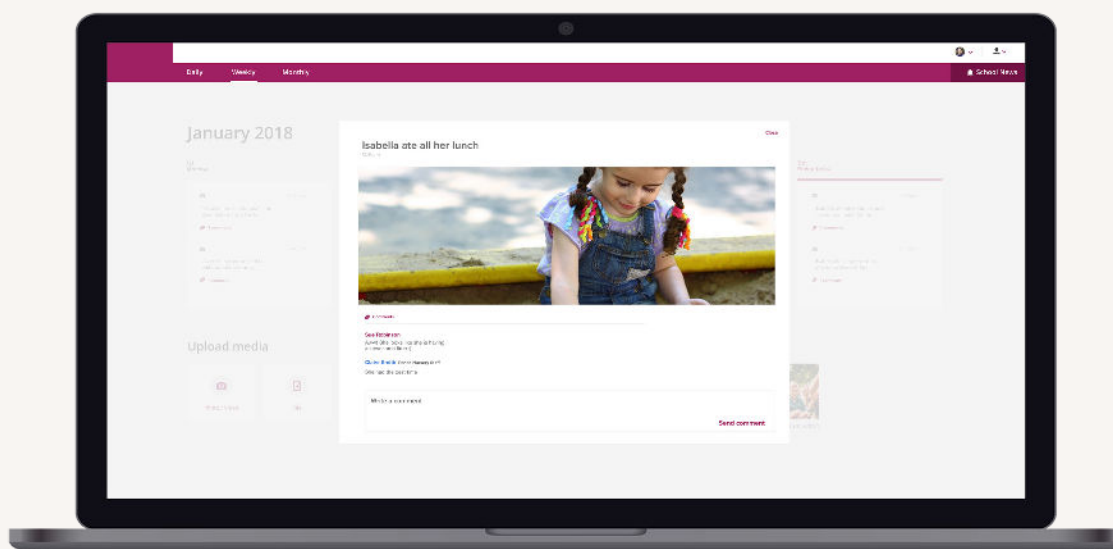

Communication

Send daily and termly reports back to parents using Parent Passport. The reports tell parents exactly what their child has been doing and allows them to understand their child's growing imagination. Parents can also receive their child's personal care diaries which track every meal, nappy change and sleep routine, along with any medical or health logs.

Keep parents fully involved

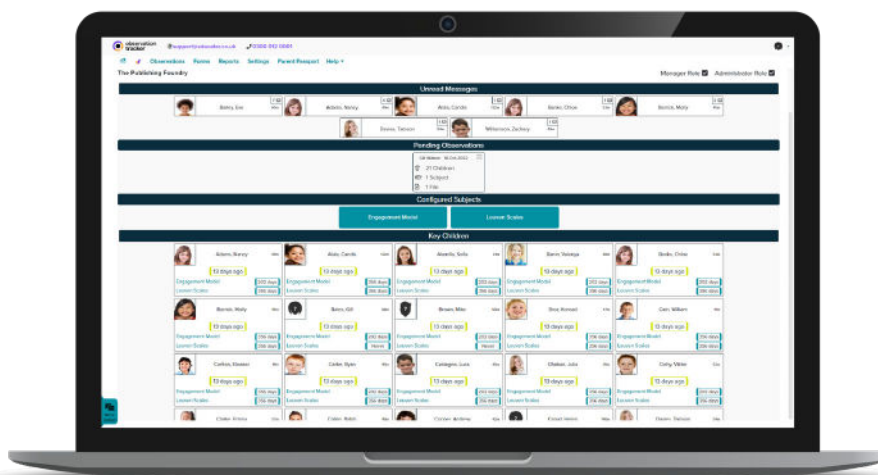

Parent Passport (included with Tiny Tracker) is an easy to use online parent portal that allows schools and early years settings to communicate directly with parents. With Parent Passport, schools and early years settings can share child observations, daily care diaries, announcements and regular updates on learning with parents.

Observation Tracker

Observation Tracker can be used to easily monitor your pupils, students or trainees to gain insights into how well they are progressing and whether they are achieving their targets. Our Observation Tracker has been created to allow you to customise the system according to the level of education you specialise in. Adapt the system to include your specific curriculum with unique objectives and have the freedom to make your own decisions.

Adapted to you

The system has been created and developed to handle any type of curriculum you wish to utilise. What's more important, is you decide on how to run Observation Tracker. Define your curriculum, make it yours. Add your values and what you would like the curriculum to mean to your setting and make planning based on learning and development which can be observed in a unique approach.

SEND Pupils

Observation Tracker provides support to schools to track the small step progress of SEND pupils. The pupil observation tool is designed to assist teachers to track their assessments, meaning that all pupils within a school can reach their full potential.

Whether you are using the Engagement Model, the National Curriculum or your own framework, you can bespoke your own curriculum templates and objectives to make the system unique to your setting.

One-to-One Tuition

We understand that each student has a unique and personalised approach to needing educational support. With the help of Observation Tracker, you can accurately pinpoint a student's next steps in learning and ensure they can accomplish these to reach their goals.

Our platform will allow you to record meaningful assessment observations and detail every rewarding moment, achievement and milestone. Using the reports function will always keep you and parents updated on the student's performance.

Apprenticeships and Workplace Qualifications

Observation Tracker is available for observing and assessing the progression of apprentices as they undertake their apprenticeship or for monitoring other workplace training and qualifications.

Using our smart software, you can input important observations and compile a detailed portfolio containing evidence of their achievement and progress across the whole company. As a result, you can readily access the evidence for end-point assessment (EPA) for apprentices, or indeed quickly access evidence for submissions required in any other qualification.

A photograph of a female teacher with dark hair tied back, wearing a dark blazer, leaning over a desk. She is smiling and looking down at a student's work. The student, a young girl with dark hair, is sitting at the desk, looking down at her work. The background is slightly blurred, showing a classroom setting with windows and other students in the distance. The entire image has a semi-transparent purple overlay.

“The reports that you can generate are extremely useful, particularly when reporting data to SLT and Governors. Our staff appreciate the efficiency of the pupil progress reports which summarise pupil progress and attainment succinctly.”

Laura Trelfa
Headteacher

Micklehurst All Saints CE Primary School

Communication Hub

Mail

More information

Mail is an easy-to-use online communication tool, offering both email and SMS options, that allow schools and early years settings to communicate directly with parents.

Key Features of Mail's parent and school communication software

✓ Distribution Method:

Choose to send communications through email, text, letter, or any combination of the three.

✓ SMS Bolt-On:

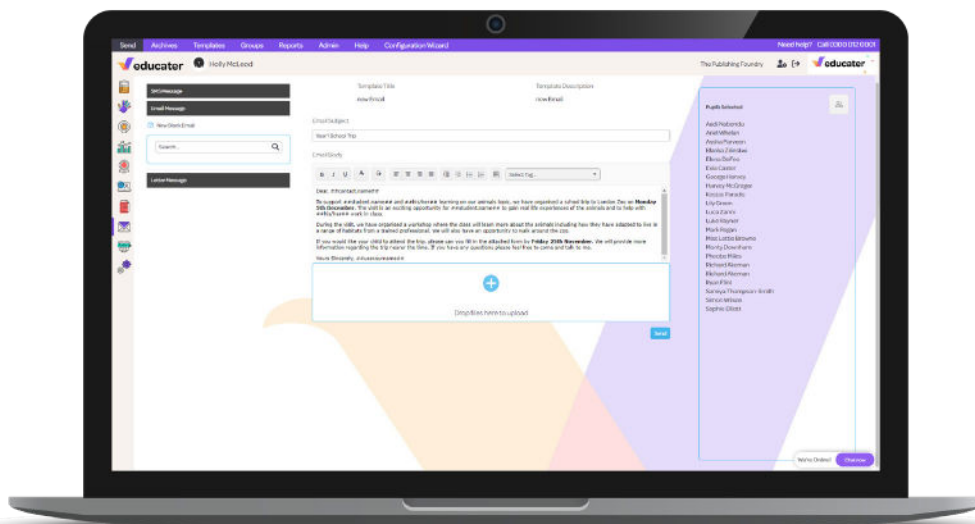

Send bulk teachers-to-parent text messages within a few seconds with our school SMS system, choose from our competitively priced teachers-to-parents text service packages.

✓ Pre-Defined Emails:

Pre-written templates with correct attachments if required.

✓ Print-to-Post Bolt-On:

This bespoke service means that those letters you created and are ready to send, can be printed, put into envelopes and sent by us.

How Mail can benefit teacher-to-parent communication in your school

✓ **Personalisation:**

Mail supports you to produce teacher-to-parent communication in a quick and easy process.

✓ **Maintenance:**

Maintains high levels of consistency in parent and school communication.

✓ **Time Saving:**

Using Educater Mail will help to save your establishment time and money.

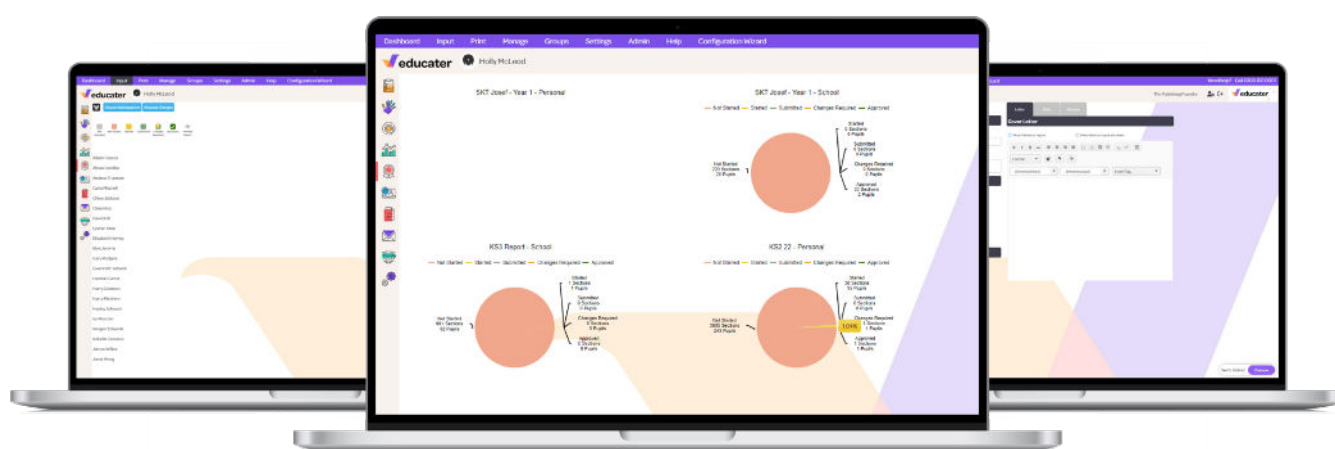

Report Writer

Book a demo

Report Writer is a web-based module created to make report writing more personalised and less time consuming. Report Writer connects with the rest of the Educater platform to bring information on progress to the forefront of school report writing. It is integrated with the Assessment module and provides a range of standard report templates. However, our team are on hand to help you create bespoke templates for your school should you wish.

Key features of Report Writer

✓ Easy Access:

Whether you're in school or at home, the Report Writer module is web-based and will allow you to access the module anywhere and at anytime.

✓ System Dashboard:

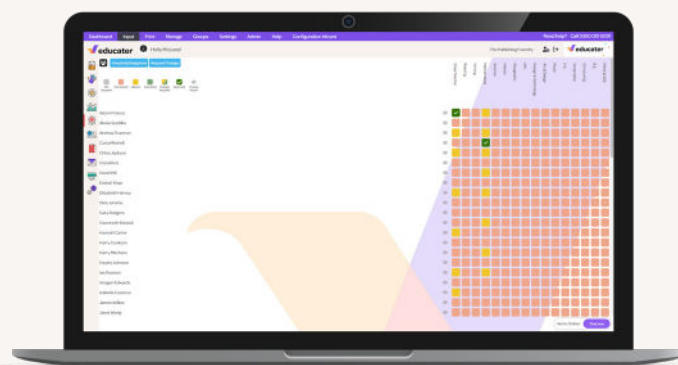

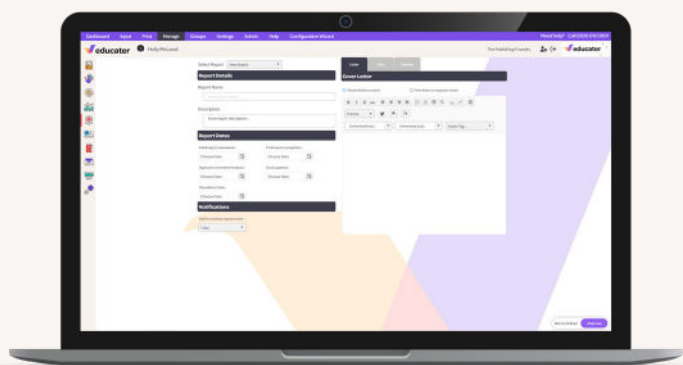

Use the system dashboard to monitor your progress and final outcomes. Senior Leaders can also easily keep track of the reports which have been submitted for approval ages.

✓ Bank of Statements:

Teachers can build their own bank of statements. These are stored and can be dragged into the report comment builder, helping you strike the perfect balance between time efficiency and personalisation.

✓ Reports to Parents:

Once everything is completed, Educater can use the information in your MIS to automatically email the reports directly to parents and carers.

SEND

The online SEND tool is a unique approach to managing your internal process as well as dramatically reducing the administrative burden for your SENDCOs and other educational staff. The aim of SEND is to make the process simpler and we have a range of standard templates included, for example IEP, Simple Behaviour Support Review and Simple Support Plan Review. We can also create bespoke templates for you, for example Local Authority EHCPs.

How SEND is a beneficial SENDCO tool

✓ **Communication with Families:**

Educater SEND will help to improve communication between professionals and families and brings together education, health and care teams through an online EHC management platform.

✓ **Time Management:**

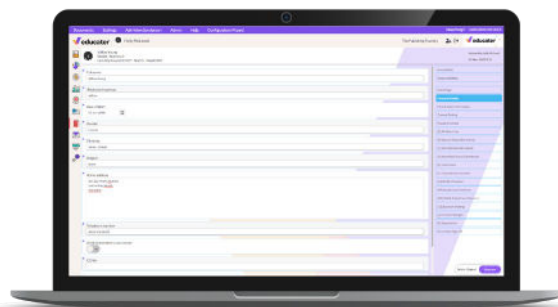

SEND is also a great way for educational staff to learn about their pupils' needs and helps towards making every teacher, a teacher of every need. The SENDCo software breaks everything into simple, manageable chunks.

✓ **Central Focal Point:**

Provides a central focal point for your school and outside agencies to contribute towards the EHCP process and ensure that the outcome is positive for the individual who is placed at the centre of the EHCP or IEP.

✓ **IEP and EHCP Management:**

Helping to meet the reduced 20-week statutory time-frame.
By providing better IEP and EHCP management, our SENDCO software provides a quicker turnaround and ultimately support actions for pupils resulting in a more effective learning.

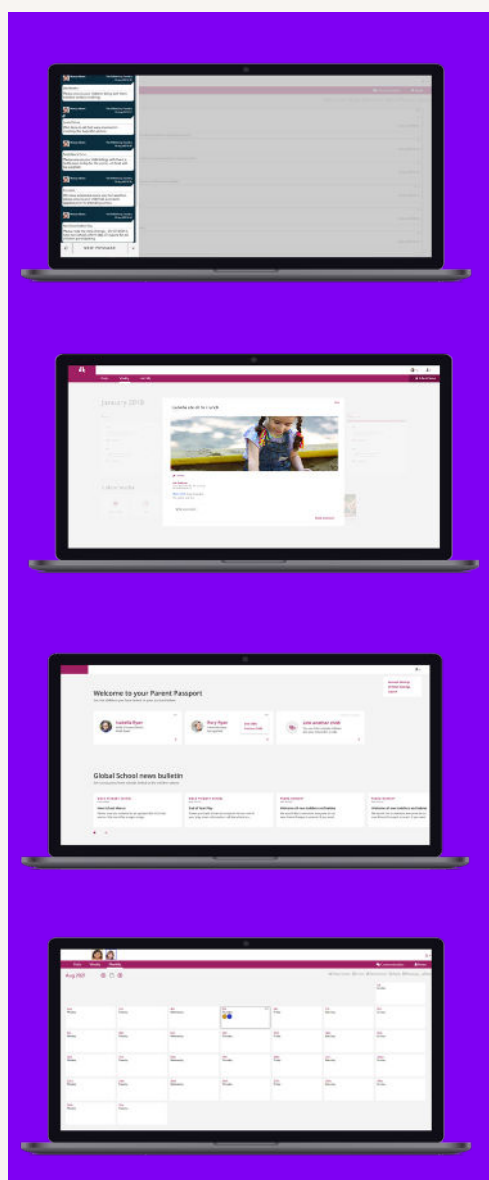

Parent Passport

Parent Passport (included with Tiny Tracker and Observation Tracker) is an easy to use online parent portal that allows schools and early years settings to communicate directly with parents. With Parent Passport, schools and early years settings can share child observations, daily care diaries, announcements and regular updates on learning with parents.

Key Features of Parent Passport

- ✓ **Two-way Communication:**
Share observations with parents and easily allow them to communicate with feedback and comments.
- ✓ **Care Forms and Diaries:**
Create a variety of forms which could include daily care logs (meal times and sleep patterns) and medical forms to keep parents informed of daily activities.
- ✓ **Important News and Bulletins:**
Upload newsletters and correspondence so parents can keep up to date with important news and announcements.
- ✓ **Switch between children:**
Parents who have more than one child can switch between multiple children, even if they don't attend the same education setting.

A background image showing a teacher and two students working together at a table. The teacher, a woman with blonde hair, is leaning over the table, pointing at a document. One student, a boy with glasses, is also leaning over the table, looking at the document. Another student, a girl with dark hair, is standing behind the boy, also looking at the document. The table is covered with papers and a blue folder. The image has a purple overlay.

“In regard to data input and monitoring assessment, I believe Educater is very user friendly. To input you just click on the relevant statement (depending how you customise your own school’s setting) and tracking student progress can be done using the reports.”

Bradley Jowitt
Seven Hills School

Evaluation Hub

Analytics

Analytics allows you to examine pupil data at various levels and drill down to individual pupils. Data sets include EYFS, Phonics, KS1 and KS2, and aggregated MAT data. The Analytics module is perfect come results day to discover how well you have done. It uses your data and provides a comparison based on national data, alternatively if you have your own bench mark data this can be compared.

Print or share your interactive reports

Early Years Foundation Stage Reports

Our EYFS report begins with the usual cohort characteristics info with a complete analysis of strengths across all seventeen aspects of learning. You can then expect to move on to Good Level of Development, % of pupils in the lowest 20% for your authority and finally % of pupils meeting and exceeding the expected level across the early learning goals.

Phonics Report

Kicking off with a contextual page the report moves on to show strengths and areas to investigate. This is followed by breakdowns of Y1 and Y2 phonics results by the main vulnerable groups.

Key Stage 1 Outcomes Report

Everything you need to analyse and digest your KS1 outcomes. Includes Reading, Writing, Maths and Phonics with separate analysis for Disadvantaged pupils. Trend (subject to historical information) and contextual data are also included.

Key Stage 2 Outcomes Report

Comprehensive coverage of KS2 outcomes. The report breaks down each subject into Expected Standard and Greater Depth, with separate analysis for Disadvantaged pupils. Each subject is split into Attainment and Progress. In addition, the Outcomes Report provides an overview of your cohort's strengths and areas for investigation.

Key Stage 2 Pupil Report

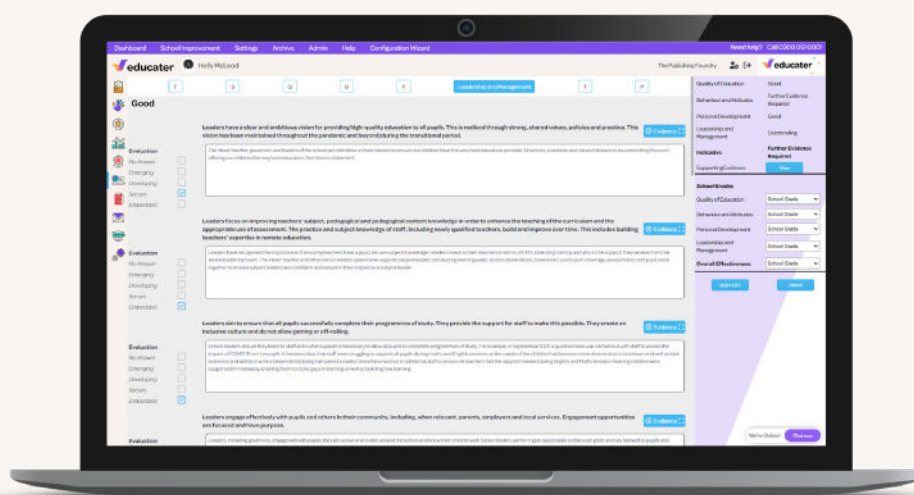

This is an interactive report that allows you to filter and sort individual students or groups. For example, you could list pupils in alphabetical order, by highest attainers or by progress from KS1. You can also filter groups, such as Disadvantaged or SEN, to examine them in isolation. The interactive nature allows for easy highlighting.

SEFOnline

Book
a demo

An online Self Evaluation tool that will support you in shaping School Improvement Plans and be fully prepared for your next OFSTED inspection. Designed by school leaders and inspectors, SEFOnline provides you with an accurate indication of where your school is and aligns with the new Ofsted Inspection Framework.

Completing the Self Evaluation Form doesn't have to be a laborious task

Use Pre-existing System Data

Integrates with Educater Assessment and pre-populates statutory assessment information.

Simple and Meaningful Process

A highly intuitive, automated process which guides leaders through the self-evaluation process.

Future Improvements

Identified areas generated from your school's SEF can be implemented into your School Improvement Plan and managed in SEFOnline.

Simultaneously View Your SEF

Export your online Ofsted SEF in PDF format at the touch of a button and send directly to the lead inspector, to SLT or to governors.

“Educater has reduced workload for all significantly, without compromising effectiveness and quality. An excellent must have for any school looking at improving their assessment and reporting systems, meeting all GDPR requirements.”

Mark Dakin
Headteacher
St Giles' CE Primary School

Who We Support

Who Uses Us

At Educater, we aim to provide schools, early years settings and other organisations with a data tracking system that is reliable, straightforward, and user-friendly.

No matter how big or small your setting is, we can provide you with a tool to meet your every need and guarantee your tracking of data is achieved successfully. Educater is flexible in both content and use, allowing you to make it as simple, or as complex as you need.

We want to help. We can support you and your setting in whichever way you need us. We don't expect you to change the way of doing things to suit the programme, we can set up the programme to suit your way of doing things.

Early Years Settings

The Tiny Tracker system enables preschool and reception staff to identify how young children are progressing.

Primary Schools

Designed in collaboration with leading experts to ensure the system meets the requirements of all primary schools.

Academies and Multi-Academy Trusts (MATs)

Helping MATs to reach their full potential by providing Teachers and School Leaders with a fully bespoke system.

Independent Schools

Educater provides a customised pupil tracking solution for independent schools.

International Schools

Educater is not only available in the UK but internationally as well.

Special Educational Needs Schools

Supporting special schools in bringing education, health, and care professionals together.

Secondary Schools

Designed in collaboration with leading experts to ensure the system meets the requirements of all secondary schools.

One-to-One Tutions

The Observation Tracker allows tutors to record assessment observations and milestones for students.

Apprenticeships and Workplace Qualifications

Supporting employers in recording trainee observations and compiling portfolios

Why Use Us

We understand how valuable your time is, which is why choosing Educater as your data tracking system, you are guaranteed a reliable and straight-forward platform, that will enable you and your team to spend more time effectively in your setting.

School Leadership

With educational industry experts and software developers, the Educater system has been developed to meet the requirements of all establishments.

School Improvement

Review each school's thoughts on their own strengths, training requirements and areas for improvement as one of their areas for evaluation during inspections.

Bespoke Report Writing

We have hundreds of different assessment tracking reports designed to give you control on how you analyse your pupil data. Our reports range from attainment, progress, contextual, to pupil-based reports including Gaps in Learning.

Reduced Teacher Workload

Educater's school planning and assessment tracker is a system that can support teachers and school leaders in managing their workloads more effectively.

Improved Lesson Planning

Educater's tools help to relieve teachers from a large volume of paperwork, allowing their time to be better spent focusing on revising lesson plans and teaching their pupils in the classroom.

Outstanding Customer Service

All Educater training is provided by experienced Education Consultants with years of experience in Senior Leadership roles. Help is just a call or click away when using Educater via phone, live chat or remote support.

A photograph of a classroom scene. A woman, Emma Williams, is sitting on the floor on the left, facing a group of children on the right. She is gesturing with her hands while speaking. The children are sitting on the floor, listening attentively. In the background, there are bookshelves filled with books and a large window. The entire image has a semi-transparent purple overlay.

“We use Educater to track English, Reading and Maths as well as developing our own, custom-made foundation subject grids as well as developing a Learning Behaviour grid.”

Emma Williams
Headteacher
Whitby Heath Primary School

The Learning Hub

What is the Learning Hub?

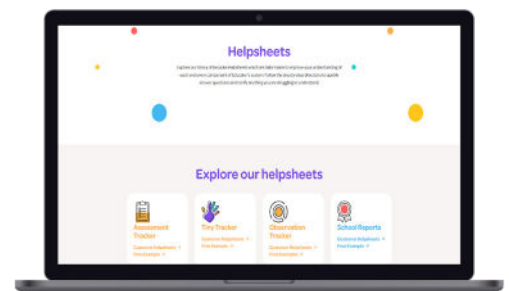

Our online resource centre for help and support. Here at Educater, we believe our role is far wider than providing a bespoke educational software solution. It is important to us that our software is accessible and reliable for you and your school. We understand that help and guidance is vital in getting you started, hence why our Learning Hub is here to help you understand the controls and feel confident using the system.

The Learning Hub is the place to find all of our resources. Whether you are a new or an existing user, we've got you covered, with a range of helpful and bespoke resources that will allow your school to find the answers to questions and learn more about Educater's software.

User Support

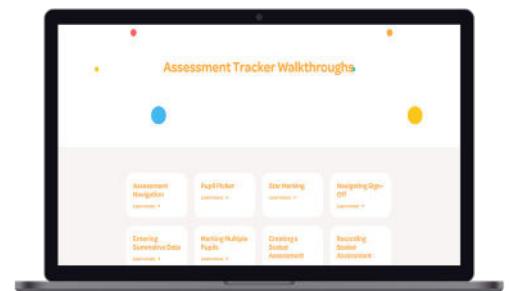

Helpsheets

Explore our library of bespoke Helpsheets which are tailor made to improve your understanding of each and every component of Educater's system. Follow the step by step directions to quickly answer questions and clarify anything you are struggling to understand.

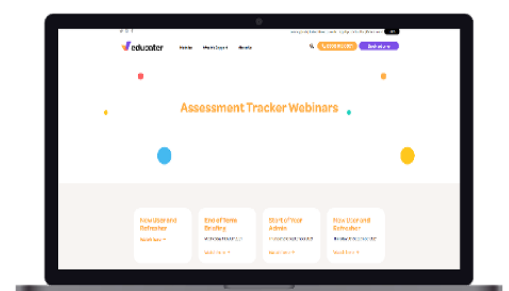

System Walkthroughs

Supported by our Helpsheets, follow our video walkthroughs to gain a deeper understanding about how each different section of our system works. Pause, fast-forward or rewind, these videos allow you to follow our narration to help you benefit from each and every feature.

Webinars

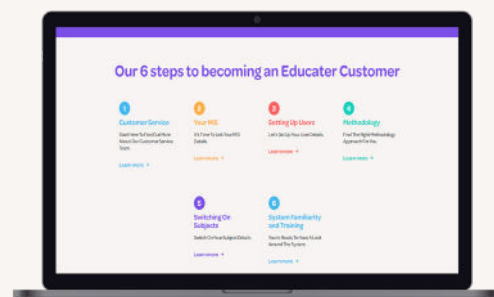

Catch up or rewatch any of the live webinar sessions hosted by our Education Consultants.

New Users

Getting Started With Us

We are always excited to start working with a new customer. To make getting started simpler, we have our 6 steps to becoming an Educater Customer.
